

SUPPLEMENT

1985 AND LATER SERVICE INFORMATION

The following supplement provides procedures unique to all models since 1985. All other service procedures are identical to earlier models.

The Fourtrax 70, TRX125 and Fourtrax 125 are essentially 4-wheeled versions of their 3-wheeled counterparts of the same engine displacement. The engine, clutch and transmission assemblies have only the usual yearly minor updates and are covered in their respective sections in this supplement. The major changes relate to the front end of the vehicles which have an additional wheel, new steering assemblies and brake systems.

On all 4-wheel models, refer to the latest year of the same displacement engine (i.e. 70 cc or 125 cc) for *all* maintenance and service procedures that are not covered in this supplement.

The chapter headings in this supplement correspond to those in the main body of this book. If a chapter is not included in the supplement, there are no changes affecting models since 1984.
